

NEW YORK, NY – JULY 14, 2026

Signal Proxy Intelligence Recommends **MIXED** on byNordic Acquisition Corporation Ballot Items Ahead of August 6, 2026 Annual Meeting

Independent research firm publishes item-by-item recommendations on all 2 ballot measures within 18 hours of the company's proxy filing.

NEW YORK, NY — Signal Proxy Intelligence, the independent proxy research division of Signal Law Group, today published its recommendations on the August 6, 2026 annual meeting of byNordic Acquisition Corporation. The firm issued a recommendation on each of the 2 items on the ballot, published 18 hours after the company's definitive proxy statement was accepted on EDGAR.

Reviewing the ballot from the perspective of the common shareholder and using publicly available information only, Signal assigned the meeting a concern band of **Elevated**. Signal recommends AGAINST the Extension Amendment Proposal because the filing allows the board to extend the termination date monthly without another stockholder vote.

"I recommend AGAINST the Extension Amendment Proposal because the filing would permit the board to extend the termination date monthly without another stockholder vote. I support the Adjournment Proposal because it would allow the meeting to be adjourned to solicit proxies if votes or quorum are insufficient. This recommendation reflects the public filing and is entered into the ledger for reconciliation against the company's reported vote."

Lou, Lead Analyst, Signal Proxy Intelligence

Where the firm's recommendations diverge from those of the incumbent proxy advisors, the divergence and its basis are documented in the full report.

The complete item-by-item analysis, including the rationale for each recommendation and the comparison to incumbent advisory positions, is available at signallawgroup.com.

BALLOT SUMMARY — RECOMMENDATION BY ITEM

1	Extension Amendment Proposal	AGAINST	ISS — • GL —
2	Adjournment Proposal	FOR	ISS — • GL —

About Signal Proxy Intelligence

Signal Proxy Intelligence is the independent proxy research division of Signal Law Group, an independent research and investigations firm. Signal publishes FOR / AGAINST / WITHHOLD recommendations on every item of every covered proxy ballot within 48 hours of filing, analyzing each measure from the perspective of the common shareholder using publicly available information. Signal accepts no revenue from the companies it covers. Every recommendation is timestamped at publication, fingerprinted, and reconciled against the company's reported vote.
